- We Help You Boost Effectiveness
- We Help You Expand and Strengthen
- We Help You Increase Accountability
- We Help You Improve Efficiency

TRS Technology Solutions' 501(c)3 Technology Initiative is dedicated to providing Extremely Discounted Voice, Data and Security Services to Nonprofit Organizations... **Helping Your Organization Do More With Less!**

Intro To TRS Technology Solutions

Just in case you don't know, TRS is a provider of Voice, Data and Security services for Central Texas.

For over 36 years now, we've been helping businesses of all sizes with Phone Systems, Structured Cabling Systems (Cat. 5E, Cat. 6E and Fiber Optics), Intercom and Paging Systems, Wired and Wireless Networking (which includes Cyber-Security and Managed Services) as well as Digital and IP Camera Systems.

Plus, we're now offering Access Control Systems and Intrusion Detection Systems, which when integrated with our Camera Systems provides you a cohesive and unified Security System.

Whether you need 3 devices or 300, TRS can help make sure your organization gets the professional-level service you need. We provide only the highest quality of technology and always the most cost-effective solutions available.

TRS is *NOT* like the "Other Guys"

First off, **We Actually Care About Our Clients...**

With TRS, it's NEVER about "how much money can we make?" It's ALWAYS about "how can we help you?" "How can we make your life better?"

TRS Is So Much Better Than Different!

Founded On Three Simple -Core- Principles

Mike Baumann, Sr. founded TRS (way back in October of 1983) on three simple, yet timeless, principles... Value, Service and Integrity:

VALUE - Provide the most cost-effective solutions.

SERVICE - Build trusted business relationships.

INTEGRITY - Always deliver more than promised.

Now, today, in an industry that's increasingly become more and more riddled with mediocre equipment, substandard installation practices, limited and/or over-valued support options, questionable sales tactics—where "Captive Pricing" sales models have become the norm—TRS is taking a stand.

Standing on our core principles, TRS becomes your lighthouse in the storm of controversial sales tactics and unreliable service.

Putting Customers First

Our unique blend of putting the customer first—in *all aspects*—and delivering only the most cost-effective solutions with the highest quality of equipment—including *Huge Discounts For Nonprofits*—puts TRS in a category all on our own.

A Powerful Shift

TRS is making a powerful shift in our service offerings... and is now dedicated to serving 501(c)3 Nonprofit organizations, which we believe have been historically *Under-Served* and *Over-Charged*.

TRS believes that *Now Is The Time* for someone to start looking out for Nonprofits... instead of trying to take advantage of them.

Making A Difference

TRS is making a difference where it matters most. We're making sure all 501(c)3 Nonprofit organizations are able to get the new technology they need *Without Breaking The Bank!*

The Greater Good

TRS knows the savings we can help Nonprofit organizations reap will go so much farther towards the greater good.

The money Nonprofits will save on technology will be so much better spent on helping their own missions and community outreach succeed.

TRS Is Standing Up For The Nonprofit Organizations!

Dedicated To Serving Those That Serve The Community!

**501(c)3
Nonprofit
Organizations
Are LITERALLY
Doing God's Work!**

TRS Is Giving Forward

The work the Nonprofit organizations do shape our community, and are often a last resort for people and families in crisis.

TRS is doing our part to help in every way we can. Which starts with **Gigantic Discounts** for local Nonprofit organizations on Voice, Data and Security systems and services.

Huge Discounts On Phone Systems

Thanks to our partnership with Panasonic, TRS can save 501(c)3 Nonprofit organizations **up to 45% Off of a New Phone System**, as well as provide a **Free Seven Year Warranty**.

TRS always includes at least **60-Days of Installation**, which includes Onsite and Remote Programming, Configuration and Maintenance for all Nonprofit organizations. This is how we protect you and your organization from the "Installation Overages" and the other "Surprise Fees" the "Other Guys" charge you with.

Better than that, very often, TRS is able to donate 50% (or even 100%) of the overall Installation Charges to help further ensure your Nonprofit organization is getting the absolute best deal.

Huge Discounts On Networking Services

TRS can save Nonprofits **up to 25% on Networking Services** and often time **up to 75% on Managed Services**.

TRS has (what I believe is) the ***Fairest*** Managed Services Offering **EVER**. But, I must say, I am biased.

I've personally spent over 18 months designing and tweaking the system and pricing model specifically so **you only pay for services you're actually getting**. This is not like all the other platforms, which are all (seemingly) built on the "Mailbox Money" concept.

TRS can also help you with cost-effective Data Back Up Solutions.

Huge Discounts On Security Systems

TRS can save Nonprofits **up to 40% on New Security Systems**. This includes the "out-of-the-box" and Completely Customized Camera Systems, as well as the stand-alone or integrated Access Control Systems and/or Intrusion Detection systems.

Are You Ready To Learn How Much Money You Can Save?

Call Michael at TRS Technology Solutions Today at 254-526-8900 and let us get you The Technology Your Nonprofit Organization Needs At A Price You Can Easily Afford!

**TRS Is
Ready To
Save You A
Bunch Of Money!**

Flexible Payment Options

TRS has very flexible payment options that include "Same As Cash" and even "as a Service" payment models to help further simplify the process and ease the strain on the check book or cash flow.

Our goal is to make sure your organization ***can afford*** the new technology it needs to help reach its goals and/or protect itself (and its members, volunteers, staff and patrons) in today's uncertain times.

Donations Are A Possibility

Depending on the actual needs of your organization—**especially if you don't need new equipment**—TRS may be able to help you get the equipment you need donated.

We are making a definitive effort to get businesses that have good equipment, but are still upgrading to more current equipment, to donate the system through us to special organizations that don't have the budget to upgrade all the way to new.

If so desired, TRS can also help you initiate a Funding Campaign to solicit funds to procure the desired equipment.
